The countless pasta shapes and the flavours of accompanying sauces have evolved over centuries (from around 1271 A.D.), moulded by Italian society and its regions through the passing down of recipes from mother to daughter. In the south semolina dough is shaped by hand, while the central areas opt for the silky smoothness of dough made with eggs, mirroring the richness of the landscape from the picturesque Tuscan hills to the ancient sites of Rome. The best flavour comes from cooking the pasta with just the right amount of salt in plenty of boiling water allowing it to swim freely until it's al dente.

There's an art to choosing the right pasta for the right sauce; the twisted shape of casarecce marries well with pesto, long ribbons of pappardelle can stand up to hearty meat-based sauces, while ravioli with its flavoursome filling can be simply served with a light butter sauce.
